... deliveries on time. He must always ... make the delivery alive. He must always complete the transaction while alone, because other people's emotions would only complicate things. And he must always report any special cases he finds." Synopsis The story is set in a small village, where Martin is working as a transporter of "dead" people. He is visited by the local minister, who asks him to go and visit the man who keeps disappearing from the graveyard. Martin agrees, but when he arrives at the graveyard he sees that it is full of the corpses of the villagers who have disappeared in recent weeks. When he asks about the people who have disappeared, the graveyard appears to move from one grave to another, and he begins to see his three rules as having something to do with the disappearance of the dead villagers. Reception Lemony Snicket was well received by most of the reviews, and the Graphic Audio edition is highly praised for its music and sound effects. Publishers Weekly noted that the story makes good use of the book's illustrations, commenting that "the attention to detail and the technique for integrating Martin's thoughts with the pictures make this an audiobook to look forward to." The reviewer for Booklist said that the "wonderful text" was the strength of the novel. An in situ hybridization method has been used to study expression of nerve growth factor (NGF) mRNA in adult rat brain. NGF mRNA was detected in discrete groups of neurons in several telencephalic regions, including the neocortex, hippocampus, amygdala, piriform cortex, thalamus, hypothalamus, and brain stem. In the neocortex, NGF mRNA was detected in large multipolar neurons in the middle layers of the cingulate cortex, and in small neurons scattered throughout the layers. Other cortical neurons which also expressed NGF mRNA, but to a lesser extent, included pyramidal, spiny, and smooth stellate neurons. Damage to the motor cortex caused marked and progressive changes in NGF mRNA expression. Lesions of the anterior cingulate and the secondary 82157476af
